

Securing Your Microsoft® Windows® 10 Computer

Course Specifications

Course Number:

025011-07

Course Description

Overview:

Security is a growing concern for all organizations and individuals dependent on computers on any level. And, with a growing push toward web-based computing, the concerns people have about security issues are growing even more quickly. This course will show you how to use an array of security features in Microsoft® Windows® 10 to keep your identity and your information as safe as they can be.

Target Student:

This course is designed for end users who are familiar with computers and who need to use the features and functionality of the Windows 10 operating system for personal and/or professional reasons.
